WNTC Poll Plans Future Program

Starting Monday, May 15, every person in the dorms at State and Tech will be given two programming questionnaires by a representative of WNTC. The results of this poll will be tabulated and will be the basis for the programming of the station beginning next semester. This is being done to find the students' tastes and to make the programming even more satisfactory than at present.

Other plans to reach this goal are also in the process. The personnel heads for announcing and engineering are in the process of drafting extensive training programs to start next semester.

Of course, highly trained personnel and good programming aren't the complete answer. WNTC now has on order a new Gates 16 inch, 3 speed commercial turntable, a new Revere tape deck, new microphones and other miscellaneous accessories. The station is also looking into new transmitters to eliminate interference in some of our broadcast areas.

Beginning next semester WNTC will have new equipment and personnel. The important thing at the present time is programming. When WNTC's representative gives you the questionnaire, be sure to fill it out completely and let the station know exactly what you want to hear. The poll comes out Monday, May 15.
